Scan animals, plants and minerals with the Analysis Visor (F). Once the Visor is activated, use to analyse your target.

Every discovery is logged on the Discoveries Page (E). Visit the Discoveries Page to rename or upload your discoveries and earn nanites.

Discovering all animal life on a planet rewards a large number of units.

## OBJECTIVES

☐ Explore the Amling System

Stellar Classification: B1pf // Age: 8.4 billion years  
Stellar Region: Olzuno Void

Planets Discovered: 3 / 3  
Dominant Lifeform: The Vy'keen  
Conflict Level: Formidable  
Economy: Mass Production, Unsuccessful

Plan trade routes to maximise profit. Find complementary economy types for the perfect trade route.

The wealth of a system influences how many goods they have available to sell. High wealth systems are also more likely to have high quality starships. High conflict systems carry a risk of greater pirate interference.

A screenshot of a game window titled "work". The window has a standard OS-style title bar with minimize, maximize, and close buttons. Below the title bar is a toolbar with icons for navigation (left, right, up, down arrows), a map, a magnifying glass, a magnifying glass with a plus sign, a save icon, and a speaker icon. The main content area is divided into two sections. The top section, titled "Amling", lists system statistics: "Celestial Bodies: 3 Planets", "Dominant Lifeform: Vy'keen", "Economy: Mass Production // Unsuccessful", and "Conflict level: Formidable". Below this list is a row of ten small, stylized icons representing different celestial bodies or lifeforms. The bottom section, titled "System", contains a single entry: "Non-Stick Piston". At the bottom of the window, a status bar displays the coordinates "(x=596, y=49) ~ L:240".

Windows taskbar showing search bar, taskbar icons (including File Explorer, Edge, Word, PowerPoint, Outlook, etc.), and system tray (clock, network, volume, etc.).
